The Évaluation des Acquis des Élèves en Calcul et en Français was administered in 2012 by the Ministère de l’Enseignement Pré-Universitaire et de l’Alphabétisation to grade 2, grade 4 and grade 6 (ISCED 1) students in public and private schools. The assessment was administered for the first time in 1999 to grade 4 students. In year 2006, declared “Year of Reading” by the government, the assessment focused only on students’ reading skills.

The Évaluation des Acquis des Élèves en Calcul et en Français is a low-stake written assessment, administered face-to-face and delivered through paper and pencil tests. All test-takers are presented with the same cognitive booklets or tests, which are aligned with the national curriculum.

The Évaluation des Acquis des Élèves en Calcul et en Français serves the following purposes:

- supporting teachers (training, relevant materials, etc.)
- school or educator accountability
- promoting competition among schools
- sub-national level monitoring of learning outcomes
- monitoring education quality levels
- planning education policy reforms
- building steering indicators

TYPE DE DONNÉES
Random sample

UNITÉS D’ANALYSE
Results are reported at the student, school, sub-national and national levels. Data are disaggregated by sex, geographic location (urban and rural), major cities and type of schools (public and private).

Results are published in reports, which are available in print.

NOTES
The Évaluation des Acquis des Élèves en Calcul et en Français comprises a Calculation test, and French language test and a Reading test. The tests vary across cycles: in 2006, a reading test only was administered.

Description of test items: Test items consist of multiple choice questions with three or more response options

Description of stimuli: Test stimuli consist of continuous, mixed and multiple texts.

Reporting metrics: Student performance is reported by separately for each test, using percentage of correct items. The minimum requirement to meet the national standard is a result of 50 out of 100, or 50%.

Proficiency levels are built based of those percentages: students scoring less than 25% have very low proficiency in the
considered subject; students scoring between 25 and 49% have low proficiency; students scoring between 50 and 74% have
good proficiency; and students scoring 75% and more have very good proficiency.

Echantillonnage

Méthode d'échantillonnage

The sample is drawn using a three-stage stratified cluster sampling design. Strata were defined by grouping the schools by type within regions.
In the first stage, a random sample of schools is selected in each stratum.
In the second stage, a random sample of classrooms is selected at the targeted grade, among all classrooms of the selected schools.
In the third stage, students are selected in each selected classroom.
The Évaluation des Acquis des Élèves en Calcul et en Français comprises four background questionnaires:
- student questionnaire, which collects information on grade repetition, possession of books, help for homework at home, diet, parents education, languages spoken at school and at home, household’s possessions.
- teacher questionnaire
- school principal questionnaire
- parents questionnaire
