Pakistan - National Achievement Test, Quami Iktasabi Azmaish

National Educational Assessment System - Government Provincial Assessment Centers - Provincial governments
Rapport généré le: 19 oct. 2015

The National Assessment Test (NAT) is administered annually by the National Educational Assessment System and the Provincial Assessment Centers to grade 4 (ISCED 1) and grade 8 (ISCED 2) students in general education programmes in public schools. At the beginning, the assessment was administered every four years.

The NAT is a low-stake assessment. It is a written assessment, administered face-to-face and delivered through paper-pencil tests. At each grade, all test-takers are presented with the same cognitive booklets or tests, which are aligned with the national curriculum.

The NAT serves the following purposes:

- supporting teachers (training, relevant materials, etc.)
- school or educator accountability
- promoting competition among schools
- sub-national level monitoring of learning outcomes
- monitoring education quality levels
- planning education policy reforms
- reforming curriculum and school based assessments

Random sample

Results are reported at the student, school, sub-national and national levels. Data are disaggregated by sex, geographic location (urban and rural), major cities and provinces.

Results are published in reports that are available in print and online. The results are published in the media, and disseminated through brochures and newsletters.

The NAT assesses several subjects: English language, Urdu language, Mathematics, Science, and Social Studies.

However, not all subjects are assessed every year for each class. In 2014, the NAT assessed English language and Science in
Pakistan - National Achievement Test, Quami Iktasabi Azmaish

Grade 4; and Urdu language and Mathematics in Grade 8.

The Mathematics, Science and Social studies test can be taken in English, Urdu and Sindhi. The test language depends on the children's geographic location. For example, children in Sindh province take the tests in Sindhi.

Description of test items: Test items consist of multiple choice questions with three or more response options, open-ended questions requiring short constructed responses and essay writing.

Description of stimuli: Test stimuli consist of continuous, non-continuous and mixed texts.

Reporting metrics: Student performance is reported by average score. The minimum requirement to meet the national standard is a score of 500 out of 1000, or 50%.

Echantillonnage

Méthode d'échantillonnage

The sample is drawn using a three-stage sampling design. Administrative units are selected in the first stage. No specific information on the nature of these administrative units is available. In the second stage, a random sample of schools is selected. In the third stage, students are randomly selected at each targeted grade. Schools with less than five students enrolled at each targeted grade were excluded from the sample.
Questionnaires

Aperçu

The NAT is comprised of four background questionnaires:
- student questionnaire: collects information on tuition, household and family dynamics, language spoken, favourite subject, availability of help for homework at home and availability of utilities at home.
- teacher questionnaire: collects information on age, qualification, administrative and academic experience.
- school principal questionnaire: collects information on age, qualification, administrative and academic experience, interaction with district management, relationship and interaction with teachers and students.
- parents questionnaire: collects information on qualification, occupation, help provided to the student with homework, satisfaction regarding the teacher, participation to school activities.

Mode de collecte de données

Face-to-face

Notes sur la collecte des données

The following actions were taken to reduce non-sampling error:
- Conducted a pilot survey
- Trained data collection staff
- Trained data processing staff
